

Product release ► EJBCA 4.0.7

25 Dec 2011 - Stockholm, Sweden

The PrimeKey EJBCA team is happy to announce that EJBCA 4.0.7 has been released! This is a maintenance release – 10 issues have been resolved. The most noteworthy changes can be seen below.

EJBCA 4.0.7 Release Notes ►

A maintenance release containing 6 bug fixes and 4 new features or improvements.

● **New features**

- Documented EJBCA integration with the secure email server Djigzo.
- Added a plug-in build system.

● **Bug fixes**

- Fixed an error reading large OCSP requests in some cases.
- Fixed a few minor XSS issues.
- Fixed a build issue of the Validation Authority on some platforms.
- Improved support for Chinese in the admin console.

Development continues beyond this version and all requests from the community [1] are scheduled for EJBCA 4.0.8 or later releases.

More information is available at the project web site [2] and the complete changelog can be viewed in the issue tracker [3].

PrimeKey Solutions AB

PrimeKey is the world's leading open source PKI (public key infrastructure) company, and founders and commercial force behind some of the most downloaded open source PKI projects – EJBCA and SignServer.

An open source security software pioneer, PrimeKey provides enterprise class solutions to key public and commercial sector clients worldwide. Organizations turn to PrimeKey's open source software platforms to implement security solutions (such as e-passports, product authenticity, document signing, digital signatures, unified digital identities) and their associated high speed and high availability validation.

PrimeKey's enterprise class integration, training and support services and dedication to open standards help customers achieve their organizational goals. www.primekey.se

The EJBCA project

EJBCA PKI is a Certification Authority and a complete enterprise PKI management system, delivered either as an integrable part or as a turnkey solution. EJBCA OCSP and EAC are sub functions of EJBCA PKI, and are used for on-line validation and ePassports.

EJBCA offers great advantages such as excellent cost-effectiveness, unmatched flexibility, complete integration – and full professional maintenance and support by PrimeKey. www.ejbca.com
